

Kaushik D

Senior Product Designer / UX Designer

+91 91766 11530 | kaushikuxdesign@gmail.com | [Portfolio](#) | [LinkedIn](#)

Senior Product Designer / UX Designer with 5+ years across B2B enterprise SaaS — cybersecurity, fintech, and e-commerce. Experienced in enterprise dashboards, complex admin flows, design systems, and taking products from MVP to production.

EXPERIENCE

Product Designer · Druva (Cybersecurity & Data Protection)

Jul 2024 – Present

- Designed a consolidated operational view for MSP partners that brings backup failures, storage usage, license status, and security risks across every customer they manage into a single screen — reducing a workflow that spanned 15–20 screens across separate pages and tenants down to 3, cutting the time needed to spot and triage at-risk customers. Validated the design through partner research and A/B testing.
- Designed a Security Readiness Score with a custom graph visualization built from scratch, and a guided flow within the Security Command Center that nudges admins to configure commonly missed security features — such as MFA, SSO, and geofencing — from a single widget, since leaving them unconfigured left accounts without that protection.
- Streamlined migration and cross-product journeys for managed and Druva-provisioned models, reducing setup friction and supporting clearer onboarding and adoption.
- Designed the Education License model and tenant-provisioning flow for Druva MSP, introducing a 1:4 faculty-to-student licensing ratio so schools and universities pay only for faculty seats while covering their much larger student base — with license calculation, storage allocation, and billing automated end-to-end through the Managed Services Center.

Product Designer (Contract) · AssetSprout — US-based Fintech SaaS

Oct 2023 – Apr 2024

- Took AssetSprout from MVP to a production-ready platform, designing the bill-generation, reporting, and decision-support flows financial advisors use day to day.
- Ran user interviews and competitive analysis to design a performance dashboard that puts the metrics advisors track most within one glance.

HMI Designer (Project Associate) · IIT Kanpur

Sep 2023 – Oct 2023

- Ran on-site interviews, field visits, and stakeholder workshops to ground the interface design for an autonomous vehicle in real operator behavior.

Founding Product Designer · Harmony — Bond-Trading Web App (Fintech)

May 2022 – Mar 2023

- Designed the end-to-end order-matching and closure flows for bond traders, using user testing and interviews to remove friction from the trade journey — work that supported a 6x rise in monthly traded volume.
- Established the design system and UX foundations across mobile and desktop as the founding designer, giving the product consistent, reusable patterns to scale on.
- Translated trader workflows and business requirements into wireframes, prototypes, and final UI alongside product and engineering.

Product Designer · Mason — SaaS for Shopify Sellers (E-commerce)

Feb 2021 – Apr 2022

- Redesigned the ModeMagic app experience — reworking core flows, UI, and usability — contributing to 8x weekly active users and a Shopify Commerce Award for Best App User Interface.
- Designed the interaction patterns and interfaces for automation features, making complex e-commerce setup simple enough for sellers to complete on their own.
- Ran competitive analysis and usability research to redesign onboarding and in-app guidance, helping new sellers reach their first success faster.

SKILLS & TOOLS

Design: Enterprise UX, design systems, interaction & visual design, prototyping, information architecture, MVP-to-production

Research: User interviews, usability testing, A/B testing, competitive analysis, stakeholder workshops

Tools: Figma, FigJam, Notion; AI-assisted prototyping (Cursor, Replit)

EDUCATION

Indian Institute of Technology, Delhi — Master of Design, Product Design

Jul 2018 – Aug 2020

Anna University, Chennai — B.E, Mechanical Engineering

Jul 2012 – Aug 2016
